RE: CLEANER SOLUTIONS, LLC SECURES A REVOLUTIONARY PATENT-PENDING TECHNOLOGY FOR THE COMMERCIAL LAUNDRY INDUSTRY

Cleaner Solutions, LLC announces a Patent-Pending breakthrough into the commercial laundry industry to enable operators a practical way to transform any **“Untreated Fabric”** into an **“Antimicrobial Treated Fabric”** capable of **“continuous control of microbial growth on fabric.”** Demonstrating reductions of 99%+ on gram (-) and gram (+) Bacteria such as MRSA, Staph and E.coli, between laundry washes or multiple washings. The first Patent-Pending System ever introduced into the commercial laundry industry capable of adding value across the board by delivering a permanent level of hygiene between washings on any fabric type or fabric age.

The Leading Edge, Patent-Pending Antimicrobial Material Treatment, Delivery and Tracking System is being driven by HYGIENX-8000. The HYGIENX-8000 system fully integrates a Hygienically Clean Platform into commercial laundry operations to deliver new and extended hygiene standards that are maintained and tracked long after wash. The system operates on site and remotely to allow the material to be tested, maintained, tracked and monitored during processing and through the entire supply-chain cycle. HYGIENX-8000 is positioned to retrieve data on fabrics while in-service, in-waiting, upon return and even after re-wash or multiple re-washings.

HYGIENX-8000 utilizes Microstatic, a proprietary antimicrobial solution that is renewable and water-soluble to provide maximum affinity to form a permanent bond for the superior control of microbial growth and odor.

Protecting personal space is critical today for healthcare workers, patients, veterinarians, travelers, athletes, hospitality guests and numerous channels. HYGIENEX-8000 provides an innovative solution to keep fabrics at a maximum level of cleanliness after being professionally cleaned by continuing to defend the fabric 24/7 against the presence and spread of harmful pathogens, mildew and odor causing bacteria. Extremely safe and ecologically superior solution that provides an excellent line of defense which will neither leach nor wear off between washings.

For interested parties, please contact Cleaner Solutions, LLC. www.cleansolutionsllc.com

- Laundry operators interested in the HYGIENIX-8000 FABRIC CARE PROGRAM
- Antimicrobial manufacturers or third parties interested in a license agreement for the delivery of their solutions into the commercial laundry industry.
